Subject: R9 Desk Statement on EPA Comments on Parcel G Workplan

Hi Nancy – Here's the desk statement we're using for any queries on the letter sent this week to the Navy on HPNS.
Let me know if you have any questions-

Kelly

**Desk Statement on EPA Comments on Parcel G Workplan
8-16-2018**

The U.S. Environmental Protection Agency is committed to ensuring the Bayview-Hunters Point community is protected from exposure to radiation and that the Hunters Point Naval Shipyard (HPNS) Superfund site can be safely used for work, recreation, and residential purposes. The Navy is the lead agency on cleanup at this site, and EPA and its state regulatory agency partners, including the California Department of Toxic Substances Control (DTSC), oversee and enforce Navy compliance with Superfund law and other requirements to ensure the cleanup protects human health and the environment. The site's Federal Facilities Agreement among the Navy, EPA, and state regulators sets out a procedure in which the Navy proposes draft plans and reports for regulators' comments.

Based on the high degree of potential falsification and data quality problems found on the HPNS site related to radiological work by Tetra Tech EC Inc., EPA, DTSC, CDPH California Department of Public Health (CDPH) and the Navy agree that comprehensive retesting is necessary. Retesting will start with Parcel G. In March 2018, EPA, DTSC, and CDPH proposed a scientifically driven retesting strategy that, if followed, is designed to provide confidence to regulators and stakeholders regarding when Parcel G would be suitable for redevelopment. In June 2018, the Navy proposed its draft *Parcel G Removal Site Evaluation Work Plan, Former Hunters Point Naval Shipyard* to regulators and

the public for comment. EPA's August 2018 comments on the June draft reinforce EPA and state's March proposal for a multi-phased approach to retest every trench, building site and building. After the Navy's workplan is finalized, field work can begin as soon as possible for retesting Parcel G. In the future, the Navy will also retest other parcels. The results of retesting will be an important step toward restoring confidence about progress toward future safe reuse of the property.

EPA's review comments, which we sent to the Navy on August 14, 2018, can be found [here](#).
